

The clubhouse remodel is now finished. Terrie and Marilyn did a fantastic job. It took a little longer than expected but that's the nature of construction. If you haven't been over there, you should check it out.

One of the first things you'll see is **the new Kiosk** with all sorts of useful information.

The other thing you'll notice right away is that **the gym** has moved. Instead of it being right in front of you as you go in the door, it's now a doorway on the left, opposite the hall to the sauna. The office and gym spaces were swapped, which increased the space by about 80ft<sup>2</sup>. The wall between the gym and the main room has some soundproofing technology to reduce its impact.

The treadmill was replaced and an exercise weight machine was added. The elliptical and rowing machine are still there. A heating and cooling unit was also installed. The temperature is set by the board. Please avoid leaving the window and door open so the temperature can be properly adjusted.

**The sauna** was updated with new flooring, benches, and a door. When using the sauna, please sit on a towel and turn off the light when you leave.

The biggest change was **in the main room**. Two heating and cooling units were added to improve your comfort. Temperature is automatic and controlled by the board. Please be mindful of the outdoor temperature before opening the front door or the sliding door. We don't want to try and heat or cool the world, that would get expensive.

Speaking of the sliding door, it was replaced. The old lock didn't work easily, and the opening was such that it created congestion in the sink area. Now it opens the other way and locks properly.

The sink area was cleaned up and a new microwave added. To open the microwave, the trigger mechanism is at the top of the handle, inside the handle.

The flooring throughout the clubhouse was replaced. No more stains on the carpet. The ancient couches were replaced. The pool table was refinished and is now lighter to match the room. The felt and pockets were also replaced. It looks like a new table. Please help keep it that way by not putting food or drink on the table.
